WORK EXPERIENCE

Data analyst Intern

SWARCO (Raswa)

08/2021 - 05/2022

Riyadh, Saudi Arabia

Implementation of Road Safety in the Gulf area by the use of glass beads.

Achievements/Tasks

- Designed and maintained data systems and this also included fixing the data coding errors.
- Used statistical tools to interpret data sets when it comes to glass beads production. And closely monitoring the different patterns and trends throughout the manufacturing process.
- Created several documentations that allowed my supervisors to understand the steps of the data analysis in the production of the glass beads. In which they assessed if anything needs to be improved or enhanced.

SKILLS

- Proficient in using Microsoft Office applications
- Proficient knowledge in HTML, CSS and JavaScript
- Troubleshooting
- Confident when working in groups and able to provide guidance to other members of the group.
- Capable of leading a team effectively in a timely manner.
- Dealing and tackling problems calmly and efficiently

PERSONAL PROJECTS

Exploring the Effect of Innovation on Leading Technology Firms (01/2021 - 06/2021)

- During my study of Business & Management at the University of Portsmouth I have conducted a dissertation project regarding the effect of innovation on leading technology firms.
- The study aimed to identify how different types of innovation affect performance of Amazon and Apple companies. The study also wanted to explore how research and development (R&D) enhance innovation in Apple and Amazon companies.
